This log is just under 1 month dating from <b>28<sup>th</sup> June 2023</b> to <b>24<sup>th</sup> July 2023</b>								
We we're logging these for Richard of WDH, however he didn't seem interested in them and was clearly not using them in any way to help our case so we stopped producing them.								
28 <sup>th</sup> June 2023	18:00	22:30	Lots of stomping, banging, dragging things around, then someone on a pushbike went to his door so the god balked and there was running on the stairs, after that, it was quite for a bit.	Very annoying and stressful, can be heard clear over TV, tried putting music on to cover it and could still hear it	8			
29 <sup>th</sup> June 2023	23:00	09:00	Lots of banging, followed by silence, followed by more banging, and then quite for a bit and then loud random bangs of & off for hours	Very annoying noises spread out, can't decide if we should try get someone to witness it from WDH because it keeps stopping, but then when we think it stopped it starts again, had we known it would have lasted all night we would have. We were unable to get to sleep until 3am and then we were constantly woken up. It's been worse since the recording equipment got collected, which is exactly what happened last time, it's as if they know.	8			
29 <sup>th</sup> June 2023	14:29	15:30	Stomping around, banging	Could be heard over the TV, after about 10 minutes we put music on to help droned it out but it could still be heard	6			
29 <sup>th</sup> June 2023	15:50	16:00	Walking around, some lite bangs and some louder bangs followed by a bit of quiet and then stomping	Annoying, stressful, can't relax in this flat at all when they're up. Put music back on to try level it out. (We're not playing it extremely loud; a reasonable volume is used)	8			
29 <sup>th</sup> June 2023	16:30	21:00	None stop shouting, dragging, banging, sounded like they were smashing up there entire flat in a rage for over 2 hours.	Extremely stressful, getting chest pains from all the stress now and shaking. Called WDH OneCall to try and get someone sent out to whiteness it because it's the worse it's been for ages but they said we aren't on the "WhoList" (Richard messed it up at the worse time)	10

## Sheet 2

Date	Length of Noise		Describe the noise.	How did the noise affect you? or your family?	Score it out of 10. 1= not noticeable 10 = worst /really bad.
	Start time	End time			
29th June 2023	21:45	23:00	Stomping, banging, loudly walking around, making random sudden bangs as if to deliberately bother us.	Unlivable conditions, can't even be covered up with TV or Music, using headphones but our guineapigs are terrified.	10
29th June 2023	23:10	23:40	More banging and walking around, we now currently both have headphones on playing loud music but we can both feel the vibrations from it, and see our computer monitors shake occasionally	Very annoying and stressful, even with the headphones on the vibrations from them stomping around can be felt  It was never this much when we had the Environmental Agency's recording equipment in	10
30 <sup>th</sup> June 2023	00:00	00:20	.running up & down stairs, slamming doors, stomping around followed by loud walking around	Stressful, hard to sleep.	8
Between 00:30 until morning it was unusually quiet, we haven't experienced a night that quite at all, normally there's constant walking around and banging, even on a good night there's normally lots of walking around.					
30 <sup>th</sup> June 2023	12:00	13:15	Lots of walking around and dragging sounds.	Very annoying, could not concentrate, got very stressed. Turned TV up for guineapigs but could still be heard.	9
30 <sup>th</sup> June 2023	13:30	13:40	Someone knocked on their door, then dog barked & there was a lot of running around, then walking.	Not too bad at first but the walking around got stompy towards the end	4

## Sheet 3

Date	Length of Noise		Describe the noise.	How did the noise affect you? or your family?	Score it out of 10. 1= not noticeable 10 = worst /really bad.
	Start time	End time			
30 <sup>th</sup> June 2023	13:50	14:30	Stomping around lots louder than normal, banging, running	Again, very annoying and stressful. Completely unnecessary banging and stomping around like an angry child. 100% sure it's deliberately to bother us at this point.	9
30 <sup>th</sup> June 2023	14:40	17:00	On and off Banging, stomping, slamming doors excessively loud, lots louder than when we had the Environmental Health's Recording Equipment in.	<b>"</b>  Would have called about it but it was constantly stopping & starting, e.g., 1 minute banging, 1 minute silence, 5 minutes banging, 2 minutes silence, 5 minutes banging and then 5 of silence completely random.	9
We went to town to get some shopping between this time, assuming that upstairs continued being excessively noisy					
30 <sup>th</sup> June 2023	19:00	20:00	loud walking around, random bangs, spread out, as if every 5 - 10 minutes someone randomly jumps.	Very stressful, had to turn TV up louder than normal because guineapigs keep getting scared and we've got headphones on with loud music so we can concentrate on anything at all. As well as this Lucy's grandma wanted to visit and we had to turn her away out of fear she would have a heart attack from all the noise upstairs.	10
At this point we couldn't hear upstairs because we had our headphones on as loud as possible					
30 <sup>th</sup> June 2023	22:58	23:00+	Took headphones off briefly and could still hear banging so we just put them back on	Stressful, can't relax unless we have our headphones on most of time lately	7
1 <sup>st</sup> July 2023	02:26	02:45	Walking around, light bangs	Annoying, mainly because we were just about to go to sleep and now are putting headphones back on so we don't get too stressed again. Thankfully it only lasted around 20 minutes this time and we were able to get some sleep	4

	Start time	End time			
1 <sup>st</sup> July 2023	13:00	14:00	very lite walking around, a lot quieter than normal	Not stressful for once, confusing if anything. They've not been this quite the whole time we've lived here.	1

1 <sup>st</sup> July 2023	20:13	21:10	Went into house sounded like a bull run was taking place on the stairs, there was lodes of running around and banging, stomping, things shaking, the batteries in our kitchen clock were vibrated out from it. 100% they are trying to bother us.	extremely stressful, they went in stomping all over the place as loud as physically possible, things were shaking. Can't call the guy who's dealing with it right now because its after 5pm and we can't ask for a WDH whiteness because we aren't on the "who list" yet. Had to turn TV up for Guineapigs and put headphones on as loud as possible, we now use the software (breakaway audio Enhancer) to boots the volume higher than normally possible, at this point being deaf seems like a grate alternative to this.	10
1 <sup>st</sup> July 2023	21:36	23:00	loud walking round & banging followed by less stompy walking around, then towards the end some door slamming	Very stressful, again, Lucy's grandma wanted to come round tonight seen as she couldn't yesterday, and the day started out so quiet, but again she couldn't come round to this, nor do my brother & sister want to come	7
2 <sup>nd</sup> July 2023	13:10	13:26	Lite walking around, followed by slightly louder running sounds Then louder walking around and some light – medium bangs	Not too bad, would get annoying if it was for long durations.	3
